

ROBOTICS, Inc. gasketing services let you quickly and cost-effectively dispense liquid gaskets on parts without the long lead time or expense of purchasing capital equipment.

Benefits

What can our services do for you?

- > Expand your manufacturing capacity
- > Generate high value-added
- > Provide quick turnarounds
- > Run trials, demos or prototype batches affordably
- > Outsource volume production

Knowledge & Commitment

Why use Robotics Inc. gasketing services?

- > We have **decades of experience**—making equipment and developing innovative specialized dispensing technologies
- > We know our equipment—we make the equipment that we use to gasket customer parts
- > We can do your job—whether ongoing high volume or one-time short run
- > Our services offer high flexibility for multiple part configurations

Automated Dispensing Specialists

In addition to our gasketing services, we provide complete automated dispensing system solutions, including associated secondary operations such as surface cleaning, bead inspection, nozzle tip maintenance, part handling conveyors, material conditioning, dial tables, part curing and cooling, pick & place mechanisms, metering and mixing, and auto-compensation for part-to-part variability.

Let Robotics Inc. help speed up your project or manufacturing process. Our services will assist you in meeting your tight schedule and in beating your competition to market. Call today for more information.
